

INSIGHT LANDSCAPES

## BRILLIANT LANDSCAPES

EXCEPTIONAL QUALITY AND DETAIL

Insight Landscapes are pool area specialists and experts in all aspects of landscape construction; hard and soft, stonework tiling and paving, as well as all timber constructions.

Their ability to construct quality and stunning landscapes is exhibited perfectly through the featured project. Insight Landscapes designed this project in conjunction with the owners, to make sure their needs were met. The result is this amazing and completely functional outdoor area.

The relaxing backyard retreat includes an expansive merbau timber decking area, which is perfect for entertaining family and friends and further enhanced by the metal pergola, offering a shady escape for time out of the sun. As discussed with Insight Landscapes, the owners wanted a covered area close to the pool for relaxing, which required little maintenance due to their busy lifestyles.

The shape of the pool is the main standout feature of the outdoor space with its soft curved edges, complemented by two stunning feature walls with sections of travertine paving and light stone cladding. Waterline tiles surround the pool, giving a fresh, finished look that adds to the colour tone of the feature walls and brightens the space.

Clint Gearside is the owner of Insight Landscapes, and the business has been operating since 2002. They specialise in designing and constructing landscapes for your pool surrounds, and offer a full service, from concept and design through to construction and maintenance of both pools and landscapes.

Awarded finalists in the 2009 Landscape Contractors' Association Awards for their eye-catching designs, Insight Landscapes continue to construct durable and practical landscapes throughout Sydney and the south coast.
